PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of experience designing, coding, testing, debugging, and deploying production systems in **TypeScript, Next.js, Node.js, and React Native**. Writes **clean, scalable code**, partners with development managers and product to scope work, and ships against deadlines under Agile/Scrum. Recent work focuses on **AI agent integration** for business automation alongside core full-stack delivery across web and mobile. Strong problem-solver with a track record of refactoring legacy systems and hardening critical revenue paths.

SKILLS

Frontend		Backend		Languages		Cloud & DevOps	
React	-----	Node.js	-----	TypeScript	-----	Git	-----
Next.js	-----	tRPC	-----	JavaScript	-----	GitHub	-----
React Native	-----	Prisma (ORM)	-----	SQL	-----	CI/CD	-----
		REST APIs	-----	HTML5	-----	Vercel	-----
		NestJS	-----	CSS	-----	AWS	-----
		GraphQL	-----	Kotlin	-----		
				Java (Android)	-----		
Data		AI		Testing		Practices	
PostgreSQL	-----	Gemini Flash	-----	Jest	-----	Debugging	-----
MySQL	-----	Vercel AI SDK	-----	Vitest	-----	Refactoring	-----
NoSQL	-----	Mastra	-----	Unit & integration	-----	Code review	-----
		LLM-based agents	-----	testing	-----	Agile/Scrum	-----
		LangChain	-----	Test-driven	-----	Technical	-----
		retell.ai	-----	development	-----	documentation	-----

WORK HISTORY

Full Stack Developer, 07/2025 - 05/2026

HubXP

- Refactored **~8,000 lines** of legacy code — replacing buggy, hard-to-test modules with typed, testable units — **reducing recurring production defects by ~45%** and **lifting unit-test coverage from ~30% to ~75%** in the touched modules.
- Designed and shipped **AI agent integrations** powering HubXP's flagship product, embedding **Gemini Flash** workflows via **Vercel AI SDK / Mastra** into existing client-facing features across web and mobile clients — **cutting ~6 hours/week** of manual operator work per client.
- Built and maintained a **Python** repository housing a **LangChain** agent supporting HubXP's AI workflows.

- Owned features end-to-end across the stack: **Next.js** + React frontends, **tRPC** + **Prisma** backend, and a shared **React Native** mobile app — type safety enforced from database schema through to UI.
- Authored **technical documentation** for refactored modules and AI-agent integration points to accelerate onboarding for new engineers.
- **Stack:** TypeScript, React, Next.js, tRPC, Prisma, React Native, Mastra, Vercel AI SDK, Gemini Flash, Python, LangChain, Vercel, Vitest, Agile/Scrum
- Remote

Full Stack Developer, 02/2025 - 07/2025

FutureSecureAi

- Engineered **5 production AI agents** automating human-staffed workflows for FutureSecureAi's commercial agent platform — including **Jack**, a voice-based interview agent (**retell.ai**) designed to conduct phone screenings for open job positions and take on the *triagem* (screening) step of the hiring funnel, **handling 200+ screenings/month** at peak.
- Onboarded into a large, unfamiliar legacy codebase and integrated **8+ third-party APIs** — extending capability without destabilizing existing flows; debugged and resolved cross-system issues end-to-end.
- Collaborated across engineering to scope work with development managers, pair on hard problems, and unblock peers through code review and pair programming.
- **Stack:** TypeScript, Node.js, LangChain, Vercel AI SDK, Mastra, retell.ai, Gemini Flash, third-party API integrations
- Remote

Full Stack Developer, 11/2023 - 02/2025

HubXP

- Delivered **Toki** — a SaaS for construction and renovation companies to organize project data and media — owning end-to-end work across web (Next.js) and mobile (React Native), with **tRPC** providing type-safe contracts between clients and server. Onboarded **200+ companies**, with **1,000+ React Native installs** in production.
- Launched **Zuppy** — a SaaS for issuing Brazilian electronic invoices (*nota fiscal*) for high-volume digital-product sellers (*infoprodutores*) — integrating with **plugnotas** to emit invoices reliably at scale. **Optimized the nota fiscal search SQL query, cutting response time from ~2 minutes to ~3 seconds (~40× faster)** on a database that has surpassed **1M nota fiscal records**.
- Contributed to **WePink**, an e-commerce platform for a cosmetics retailer serving **millions of customers** — led integration tests covering **campaign + multi-discount logic**, hardening a critical revenue path the client specifically thanked the team for.
- Maintained and extended the shared **Next.js + tRPC + Prisma** platform underpinning all three products, deployed on **Vercel** via CI/CD; balanced per-product delivery with cross-cutting platform improvements.
- **Stack:** TypeScript, React, Next.js, React Native, tRPC, Prisma, Vercel, Jest, Vitest, Agile/Scrum
- Remote

Full Stack Developer, 10/2021 - 04/2023

ACT Digital

- Contributed as frontend developer on a 4–6-engineer team developing the **scheduling and calendar system for Hospital Israelita Albert Einstein** — one of Latin America's most prestigious private hospital networks — covering appointment and exam booking traffic at **~10M bookings/month** scale.
- Implemented **40+ React-based scheduling components** used by patients and clinical staff; partnered with backend on **NestJS + Prisma** (ORM) REST APIs to wire features end-to-end across **30+ two-week sprints**.
- Operated under **Agile/Scrum**: sprint planning, code review, incremental delivery, close coordination with product and QA; evaluated user feedback and translated it into iterative program improvements.

- **Stack:** TypeScript, React, Node.js, NestJS, Prisma, MySQL, Agile/Scrum
- Remote

Full Stack Developer, 04/2019 - 03/2020

Quality24

- Developed **Android (Java)** screens for a patient-bedside hospitalization-attendance system used in clinical workflows; shipped to an initial **100-device pilot rollout** with a healthcare provider.
- Authored **150+ unit tests** for the **Node.js + Postgraphile** (GraphQL-over-Postgres) backend, **lifting backend coverage to ~80%** and hardening regression safety as the team shipped new endpoints.
- **Stack:** Java (Android), Node.js, Postgraphile, GraphQL, PostgreSQL
- Remote

EDUCATION

Mechatronics Engineering, 01/2013 - 12/2018

Universidade de São Paulo

- Relevant coursework: **software architecture, data structures & algorithms**, and adjacent software-engineering disciplines.
- Research scholarship — **FAPESP** (2016 – 2017): worked on **fluid simulation**, applying numerical methods and scientific computing.
- Research scholarship — **PIBIC** (2014 – 2015): implemented a **probabilistic algorithm** to analyze event relationships in critical systems.

LANGUAGES

Portuguese — native

English — advanced

French — intermediate

CAREER BREAK

Apr 2020 – Sep 2021

- Full-time caregiver for ill family member.

COURSES

- **Rocketseat — Ignite** (2021): building full-stack applications
